

## Applications

**for machines**

**in industry plants**

**in chemical plants**

**in stores**

## Description

Inside the **Exepd control panels** for zone 2 and zone 22 different components for controlling machines and plants are brought together to a **complete certified system**.

A typical example is an operator terminal with an emergency stop and a 24V power supply together in a stainless steel enclosure.

The single components itself are all certified available. By integrating them to a system, **Exepd** take care about the single requirements as well as about their combination. The result reflects on the type label especially on the temperature class or on the surface temperature information.

All the **94/9/EC requirements** regarding documentation, operating manual, production supervision and material selection are done and documented by **Exepd**.

As a **special solution supplier** focusing on customized products for hazardous area, our employees as well as our process are skilled and optimized to guarantee **high quality** by **short delivery times** on a **fair price base**.

- ◆ Component selection support
- ◆ With assessed Ex nA and Ex tD enclosures
- ◆ With declaration of conformity acc. to 94/9/EC
- ◆ With operating manual
- ◆ With assessed type labels

- ◆ **Qualified service**
- ◆ **Individual planing**

- ◆ **Made in Germany**
- ◆ **Long-standing experience**
